Corneal transplants, flaps, lasers, bubbles: recent advances in cornea and refractive surgery

Natalie Afshari, MD is Stuart I. Brown MD Chair in Ophthalmology in Memory of Donald P. Shiley, Chief of Cornea and Refractive Surgery, Vice Chair and Professor of Ophthalmology at the Shiley Eye Institute, University of California, San Diego. Prior to this, she was Professor of Ophthalmology and Director of Centers of Excellence at the Duke University Eye Center. She received her medical degree from Stanford University and her residency and fellowship trainings at Harvard University, Massachusetts Eye and Ear Infirmary.

Dr. Afshari is the recipient of the Senior Achievement Award and the Secretariat Award by the American Academy of Ophthalmology and has been named a Gold Fellow of the Association for Research in Vision and Ophthalmology. She has received the inaugural Top Ten Women in Medicine award by Triangle News, Women Who Mean Business award by San Diego Business Journal, and the Teacher of the Year award at the Duke University Eye Center. She has also been recognized in the Best Doctors in America in each listing for the past decade, and was named in the U.S. News & World Report's Top Doctors List. Most recently, she has been recognized by the American Medical Women's Association as the 2019 recipient of its Women in Science award.

Dr. Afshari is the co-editor of a two-volume cornea book titled "Principles and Practice of Cornea". She is on the editorial boards of six journals: Investigative Ophthalmology and Visual Science, American Journal of Ophthalmology, Survey of Ophthalmology, Eye and Contact Lens, Topics in Ocular Anti-infectives, and Journal of Ocular Pharmacology and Therapeutics. She has previously served on the EyeNet editorial board and BCSC Cornea textbook committee. Currently, Dr. Afshari has been on the BCSC Lens and Cataract textbook committee and the chair of the American Society of Cataract and Refractive Surgery FDA Committee. Her NIH research grant is on the study of Fuchs dystrophy, and she investigates the intricacies of endothelial keratoplasty and regeneration of cornea.

A. MULARONI (SAN MARINO)

Corneal transplants, flaps, lasers, bubbles: recent advances in cornea and refractive surgery

Alessandro Mularoni, MD, is the Chief of the Ophthalmic Department of San Marino Republic Hospital and the Director of the International Center for the Research and Care of myopia.

After achieving his Medical Degree and completing his residency in Ophthalmology at Bologna University, he became the Director of the Unit of Cataract and Refractive Surgery of the Maggiore Hospital of Bologna, that he guided from 1998 to 2015.

As a member board of AMOA (Association of Medical Ophthalmologists for Africa), Dr. Mularoni visited several developing countries in Asia and Africa in order to carry out ophthalmic care and surgery as part of humanitarian aid program.

Over the past 20 years, his primary interest has been focused on the research and development of new therapeutic modalities for keratoconic patients visual rehabilitation, especially in the field of the conservative treatments. Following this path, he developed a long time experience with corneal rings implantation, combined corneal CXL and photorefractive Keratectomy, phakic IOLs and toric phakic IOLs, deep anterior lamellar keratoplasty and use of toric IOLs in keratoconic patients with cataract.

During the current medal lecture a new ICR implantation strategy is going to be presented called 'the pachimetry strategy'.

Dr. Mularoni's clinical areas of interest are corneal surgery, anterior segment and refractive surgery.

He is author and co-author of several articles published in peer-reviewed journals and chapters book, and the main author of the book 'La topografia altitudinale' Fabiano 2005, the first book published in the world in the field of tomographic evaluation of corneal diseases.

He is the current president of the STUEMO (Italian regional society of ophthalmology), member of the Board of the Italian association of cataract and refractive surgery (AICCER), International society of cornea and stem cells (SICSSO), vice-President of Italian society of ophthalmic sciences (SISO), fellow of World College of Refractive Surgery & Visual Sciences (WCRS).
